

Dear Patient,

We are now offering FDA-approved, RYZUMVI- a rapid dilation reversal drop. Dilation is a part of your routine exam and although it is a crucial part of your appointment, we understand the inconvenience it can cause. With RYZUMVI your dilation time can be cut in half! It is safe to use in all patients who are ages 3 and older. For a small fee, redefine your patient experience post-dilation!

To receive the RYZUMVI drop, there is a charge of **\$20 per patient**. Your insurance is designed to cover only the basic eye exams and does not cover advanced tools or drops, such as RYZUMVI.

Note: RYZUMVI drops may cause temporary redness.

___ Yes, I do want RYZUMVI administered after my exam is complete.

___ No, I do not want RYZUMVI administered after my exam is complete.
