

Digital Retinal Imaging

We now perform Digital Retinal Imaging as part of your comprehensive eye exam. This advanced technology offers an instant view of the retina, blood vessels, and layer of the retina not always seen with dilation. Retinal evaluation is important for detection of many eye diseases such as macular degeneration, retinal tears, tumors, etc.... it also helps in the diagnosis and management of systemic diseases such as diabetes and hypertension among many others. Dilation will still be done as part as your comprehensive eye exam.

The fee for Digital Retinal Imaging is \$39.00 and is not covered by vision insurance plans. If you wish to receive the Digital Retinal Imaging please sign below.
